## INTRODUCTION

#### **PURPOSE OF THIS REPORT**

This report forms part of the evidence base that has been used to prepare the Southwater Neighbourhood Plan. It is a technical exercise to determine the quantity and suitability of land potentially available for (housing) development.

#### Please note that:

- This document does not allocate sites to be developed. The allocation of sites is
  determined through the neighbourhood plan; this document provides a robust
  assessment of all sites and identifies sites on which development may be deliverable.
- The identification of a site as being deliverable within this document does not imply that the site should or will be allocated in the neighbourhood plan or that planning permission would be granted for development on any of the sites.
- This is a Parish wide assessment of potential housing opportunities. It should not be
  used to assist with the determination of planning applications. Communities and
  applicants cannot rely on the findings or conclusions of this document in isolation.
- This assessment was carried out in summer 2018 and updated in February 2019, the findings provide a 'snap-shot' of information held at this time.

# WHY HAVE WE LOOKED AT POTENTIAL DEVELOPMENT SITES?

As the Parish is within the Horsham
District, the Development Plan is
prepared by Horsham District Council
and is currently the Horsham District
Planning Framework (HDPF) - adopted in
2015.

The HDPF includes provision for 16,000 new homes over the plan period in Policy 15 (see Figure 1)<sup>1</sup>. The breakdown of how these homes are to be provided

Figure 1 - Policy 15 extract from HDPF

#### Policy 15

Strategic Policy: Housing Provision

Provision is made for the development of at least 16,000 homes and associated infrastructure within the period 2011-2031, at an average of 800 homes per annum. This figure will be achieved by:

- Housing completions for the period 2011 2015;
- 2. Homes that are already permitted or agreed for release;
- 3. Strategic Sites:
  - a. At least 2.500 homes at Land North of Horsham
  - b. Around 600 homes at Land West of Southwater
  - c. Around 150 homes at Land South of Billingshurst
- The provision of at least 1500 homes throughout the district in accordance with the settlement hierarchy, allocated through Neighbourhood Planning.
- 5. 750 windfall units

<sup>&</sup>lt;sup>1</sup> https://www.horsham.gov.uk/\_\_data/assets/pdf\_file/0006/28563/Horsham-District-Planning-Framework-2015.pdf

is included and it confirms that 1,500 homes are to be provided through allocations in Neighbourhood Plans in addition to strategic allocations.

Southwater is a large parish in a relatively sustainable location. It is therefore expected that some of the 1,500 homes to be provided through neighbourhood plans are to be provided within Southwater Parish. The exact quantity of new homes is being considered separately in a Housing Needs Assessment prepared by AECOM which forms part of the evidence base.

We need to look to allocate land for new homes as the plan needs to be 'in general conformity with the strategic policies contained in the development plan', failing to allocate would put the neighbourhood plan at risk of failing to meet the Basic Conditions<sup>2</sup> required of it and therefore not being allowed to be made. In addition, this site assessment document is intended to provide clarity as to how sites have been selected for inclusion within the neighbourhood plan in the face of any potential legal challenges by developers and/or other interested parties.

## **IDENTIFICATION OF SITES**

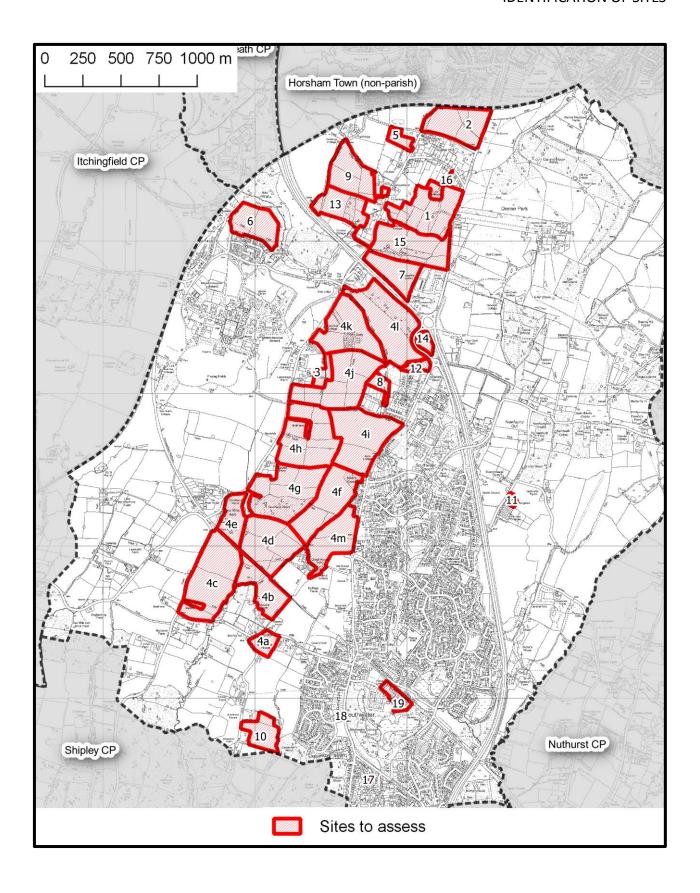

In order to identify potential development sites, the Parish Council has conducted two 'Call for Sites', the first was held from Feb 2015 to May 2015 and the second in July 2017.

Unlike the Strategic Housing and Economic Land Availability Assessment (SHELAA) prepared by Horsham District Council which excludes any site considered to have potential for less than 6 dwellings and 0.25ha (or 500m2 of floor space) for economic development, our Call for Sites exercises related to any sized site so long as it could accommodate one residential unit.

Private, public and voluntary sector bodies and individuals were invited to submit potential sites for consideration by the Parish Council. In total, 18 sites have been submitted by stakeholders through the Call for Sites exercises and these are listed below:

- 1. Land to the west of Worthing Road, north of Hop Oast
- 2. Land West of Worthing Road, north of Tower Hill
- 3. Lanaways Farm, Two Mile Ash
- 4. Land to the west of Southwater
- 5. The Hermitage, Tower Hill
- 6. The Warren, Christ's Hospital
- 7. Land North of A24 and East of Tower Hill
- 8. Merryfield, New Road
- 9. Griggs, Tower Hill
- 10. Woodlands Farm, Shaws Lane
- 11. Jackrells Lane
- 12. The Copse, Worthing Road
- 13. Stoneleigh, Tower Hill
- 14. Land at Hop Oast Roundabout
- 15. Land west of Worthing Road and east of Two Mile Ash Road,
- 16. Garden of Paddock House, Salisbury Road
- 17. Land at Foxes Close, Southwater.
- 18. Land at Worthing Road, Southwater
- 19. Sony Site, Southwater

To ensure that the assessments provide a robust scrutiny of all land submitted at the Parish scale, any sites larger than 15ha have been split for assessment purposes. A map showing the land parcels to be considered in this assessment is shown on the following page. This map shows in grey the strategic allocation included within the Horsham District Council Planning Framework, known as 'Land West of Southwater'. This allocation proposes 600 dwellings in this location to meet the strategic requirements for housing and has planning permission, which is currently under construction. As such, this land has been excluded from the assessment of potential new sites for additional housing development.

## SITE ASSESSMENTS

#### **METHODOLOGY**

Each site has been assessed in order to establish the deliverability of development on it. This considers the range of planning policy, environmental and local constraints and the extent to which these can be mitigated or addressed.

The methodology adopted closely follows the template provided by the relevant authority (Horsham District Council) and Locality, the organisation that operated the Neighbourhood Planning programme funded by the Department for Communities and Local Government (DCLG). Consideration was also given to relevant national planning policy guidance.

A draft methodology was shared with the Local Planning Authority in early October 2017 and they were invited to provide comments on it. Comments were received in late October 2017 and, where appropriate, these have been incorporated into the methodology below.

Every site has been considered using the following methodology and has been visited as part of the assessment:

## SITE & SITUATION

A review of the site's location, physical attributes and constraints and surroundings was carried out. This involved a site visit to each site.

## HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT (2016 & 2018)

Where the site was previously considered by the LPA's SHELAA the summary text was included in the assessment table.

## CONFORMITY WITH PLANNING POLICY

An assessment of the site's conformity with planning policy at the national and local level.

## **PLANNING HISTORY**

Where a site contained relevant planning history, this has also been reviewed.

## SUITABLE - IS THE SITE SUITABLE FOR THE TYPE OF DEVELOPMENT PROPOSED?

A site is considered to be suitable if there are no insurmountable physical or environmental factors which would restrict development. Whether or not a factor is insurmountable is a matter of judgement but often depends on if it can be mitigated. There are several constraints which can make a site not suitable for development, these include but are not limited to a site being within or in close proximity to a Site of Special Scientific Interest (SSSI) or being located within Flood Zone 3a or 3b, for example.

If a site is allocated within an adopted local plan, or has planning permission it will generally be considered to be suitable.

Factors which should be considered in the assessment of suitability include:

- General conformity with the policies in the adopted or emerging local plan. If the Local Plan rules out development in the location, it should not be considered suitable.
- Physical factors such as access to the site, infrastructure, flood risk or contamination.
- Sustainable locations. Accessibility to services and facilities such as public transport, shops, education and health services. If the site is not close to facilities and residents could only travel by car to access services, this location may not be suitable. Generally, we have referred to AECOM acceptable distances to assess a site's walkability to services (poorly located to shops and services if > 800m, moderately located if 400m to 800m, and favourably located if < 400m from services) and have measured distances via roads or public rights of way.</li>
- Impacts on national and local environmental and/or heritage features.
- Environmental impacts experienced by residents and neighbouring areas. If prospective residents or neighbours would be affected by the location of the site, e.g. it was adjacent to an industrial or polluted area, it would not be suitable.

## AVAILABLE - IS THE SITE AVAILABLE FOR DEVELOPMENT?

A site is available if there is evidence that a landowner or developer is willing to sell or develop the site at a known point in the future, and within the plan period. Any legal or ownership issues should also be considered, such as multiple ownership.

Sites submitted through a Call for Sites are considered available, as are sites allocated in the local plan or assessed as available in a recent SHELAA.

#### ACHIEVABLE - IS THE SITE ECONOMICALLY VIABLE?

A site is considered 'achievable' if it is economically viable and there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time.

In order to establish whether a site is viable, the following can be considered:

- Involve businesses, developers and landowners at early stages of evidence gathering to advise the neighbourhood group on viability of sites.
- Review the site using existing viability reports published by the Local Planning Authority.
   These may be called a CIL viability report, Whole Plan viability report or Affordable
   Housing Viability report. These reports will often provide an assessment of the viability of different 'typologies' of site within the Local Authority Area, e.g. brownfield town centre infill, or greenfield urban extension. These typologies can then be applied to similar sites

in the neighbourhood plan assessment to give an indication of whether that site would be viable for development.

- Check with the local planning authority that the proposals for development are appropriate and in conformity with the local plan / core strategy.
- Discuss the matter with the landowner/agent/developer.

#### ASSESSMENT OF PROPOSED DEVELOPMENT

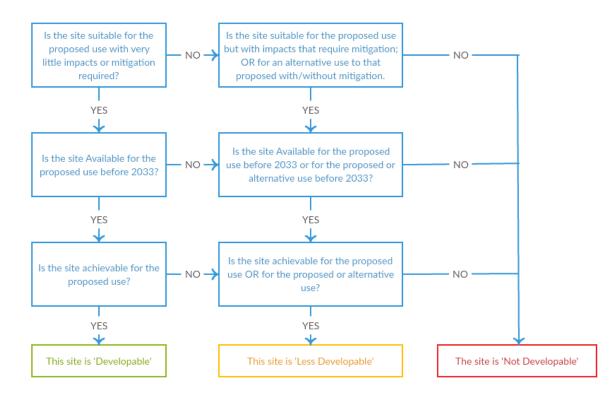

Finally, an assessment of the proposed development was conducted to provide the final recommendation in relation to each site. In this section the following was done:

**Positives** – the Positives of the proposed development were summarised.

**Negatives** – the Negatives of the proposed development were summarised.

Is the site deliverable? – This will look at the findings from the initial assessments of Suitable, Available and/or Achievable and provide summaries in relation to each point.

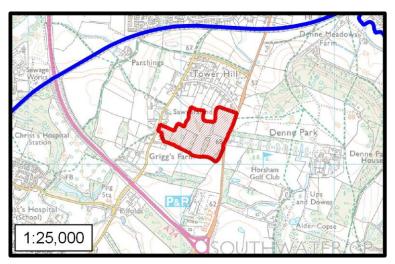

**Conclusions** – an overall summary of the proposed development and whether it is developable. If the site is considered developable it does not mean it will automatically be allocated for development in the plan. In the conclusion the site's developability will be graded in accordance with the following traffic light system (starting in the top left hand corner):

## SITE 1 - LAND TO THE WEST OF WORTHING ROAD

| SITE & SITUATION              |   |
|-------------------------------|---|
| Location                      | TQ161292 (516107, 129201)                                 |
| Site Area                     | 10 ha   |
| Developable Area              | 6.4 ha (once existing field boundary vegetation excluded) |
| Current Use                   | Agricultural Land   |
| <b>Promoters Proposed Use</b> | Up to 156 supported living and retirement units           |
| Cita Description              |   |

**Site Description** 

The site consists of a series of fields divided by thick treed boundaries. To the south lies undeveloped fields and woodland before the A23 which is circa 350m distant. The north of the site borders Salisbury Road and the residential properties along it. The site is relatively well screened but despite the development to the north the site is in a predominantly rural and undeveloped location. To the south lies the Amenity Site, Park and Ride, WSCC depot and Shell Garage close to the A24.

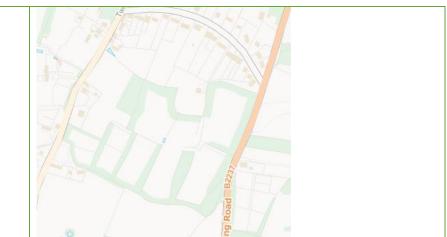

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
|--------------|---|
| Site Ref:    | SA040   |
| Conclusion:  | "The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413.  This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology |
|              | interest. Unless allocated for development through the review of the HDPF or  |
|              | via a made Neighbourhood Plan, it is considered development would be  |

| contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not |
|--|
| Currently Developable'."   |

| Site's conformity | with Planning Policy   |  |
|-------------------|--|--|
| Conformity        | The NPPF seeks to protect the countryside whilst supporting thriving rural   |  |
| with NPPF         | communities within it. It specifically states that LPA's should avoid new    |  |
|                   | isolated homes in the countryside.   |  |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A   |  |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26    |  |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |  |
|                   | character and undeveloped nature of the countryside against inappropriate    |  |
|                   | development. Development in this area should be essential to its countryside |  |
|                   | location, and support the needs of agriculture or forestry; Enable the       |  |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal  |  |
|                   | recreational use; or Enable the sustainable development of rural areas. In   |  |
|                   | addition, development should be of a scale appropriate to its countryside    |  |
|                   | character and location.  |  |

| Current Use                   | Paddock/Agricultural land              |  |  |
| <b>Promoters Proposed Use</b> | 70 to 80 units as advised by developer |  |  |
| Site Description              |  |  |  |
|                               | Tin Bridge Tin Endge                   |  |  |

The site is a field currently used for grazing. It is located immediately south of the Arun Valley Railway line which forms the parish boundary and currently the boundary of the urban area of Horsham town. The site is relatively open with views across the site from the Worthing Road (B2237) on the eastern boundary, the public footpath on the western boundary and pedestrian crossing over the railway and footpath along Tower Hill road to the south although it is noted that this boundary is heavily treed. The site slopes down towards the north and the railway line.

| HDC STRATEGIC | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT  |
|---------------|--|
| Site Ref:     | SA599  |
|               | The landowner has expressed an interest to develop the site meaning it is 'available'. The site lies in the countryside where a railway line separates it from the southern built up area boundary of Horsham, which is classified as the District's Main Town in Policy 3 of the Horsham District Planning Framework 2015 (HDPF), having a large range of services, facilities and leisure opportunities. To the south lies the settlement of Tower Hill which is an unclassified settlement as defined by Policy 3 of the Horsham District Planning Framework 2015 (HDPF) and is reliant on other villages and towns to meet the needs of residents. The Local Plan Review Issues & Options (April 2018) proposed Tower Hill as a secondary settlement meaning that some residential in-filling would be considered acceptable. However, the Issues & Options document is an early |

stage of the local plan review and holds little weight. It is considered development of this site would lead to settlement coalescence which is inconsistent with Policy 27 of the HDPF. Parts of the site have a sloping topography which may impact upon landscape character and development capacity. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4, 26 and 27 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity | with Planning Policy  |  |  |
|-------------------|---|--|--|
| Conformity        | The site is located relatively close to the urban area of Horsham and the           |  |  |
| with NPPF         | facilities and services it offers, the site would therefore be seen as a relatively |  |  |
|                   | sustainable site in NPPF terms primarily due to its location. Other issues do       |  |  |
|                   | exist and these are set out in the following tables.                                |  |  |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A          |  |  |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26           |  |  |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural         |  |  |
|                   | character and undeveloped nature of the countryside against inappropriate           |  |  |
|                   | development. Development in this area should be essential to its countryside        |  |  |
|                   | location, and support the needs of agriculture or forestry; Enable the              |  |  |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal         |  |  |
|                   | recreational use; or Enable the sustainable development of rural areas. In          |  |  |
|                   | addition, development should be of a scale appropriate to its countryside           |  |  |
|                   | character and location. Policy 4 refers to the expansion of settlements and it      |  |  |
|                   | highlights the importance of existing defensible boundaries and landscape           |  |  |
|                   | and townscape character features.   |  |  |

## ASSESSMENT OF PROPOSED DEVELOPMENT

The site's agent states: 'It is considered that well designed residential development for 70 to 80 units that respects the character of the parkland slopes to the south could be brought forward. The land to the south of the site would be maintained as open space with a positive frontage of well designed, locally characteristic built form on the northern edge, softened by characteristic

clumps of parkland canopy trees and SuDS. It is noted that a planning application was submitted for this development (DC/18/0944) and it was refused.

| Positives    | The proposed residential units will provide a positive contribution towards      |  |  |  |
|--------------|--|--|--|--|
|              | the Neighbourhood Plan's objectively assessed housing need.                      |  |  |  |
|              | Site is relatively close to the facilities and services provided in Horsham.     |  |  |  |
|              | Proposed layout provides publicly accessible open space.                         |  |  |  |
| Negatives    | The railway currently forms the edge of Horsham town. By allowing                |  |  |  |
|              | development to creep beyond this hard boundary the urban area will begin         |  |  |  |
|              | to sprawl into the surrounding countryside.                                      |  |  |  |
|              | The area of land identified for development forms the primary 'gateway' to       |  |  |  |
|              |  | d its loss will have considerable impact on the wider        |  |  |
|              | landscape.   |  |  |  |
|              | Impact on very sensitive landscape.  |  |  |  |
|              | <ul> <li>Potential for an impact on the setting of a Listed Building.</li> </ul> |  |  |  |
| Is the site  | Suitable?  | No —the site is outside of the development boundary of       |  |  |
| deliverable? | Suitable:  | Horsham in an area of sensitive landscape. Whilst it is in   |  |  |
| deliverables |  | •  |  |  |
|              |  | close proximity to facilities and transport connections the  |  |  |
|              |  | site would be 'infill' between the railway line and Tower    |  |  |
|              |  | Hill which could diminish the individual identity of each    |  |  |
|              | settlement and harm the sensitive landscape.                                     |  |  |  |
|              | Available?   | YES – the agent has confirmed that the site is available for |  |  |
|              |  | development.   |  |  |
|              | Achievable?  | YES – the agent has confirmed that development of the        |  |  |
|              | /tomevable.  | site is achievable.  |  |  |
| Conclusions  |  | se to Horsham and there are few environment designations     |  |  |
|              | present it is considered that the site is not suitable for development for the   |  |  |  |
|              | reasons given above  | <u> </u>   |  |  |

## SITE 3 – LANAWAYS FARM, TWO MILE ASH

| SITE & SITUATION              |   |  |  |
|-------------------------------|---|--|--|
| Location                      | TQ 15392 28066  |  |  |
| Site Area                     | 2.0 ha  |  |  |
| Developable Area              | 2.0 ha  |  |  |
| Current Use                   | Agricultural/residential  |  |  |
| <b>Promoters Proposed Use</b> | Capacity of around 20 to 30 units   |  |  |
| Site Description              | The site is located to the rear of Lanaways Farm and a number of other properties along Two Mile Ash Road. The terrain is relatively flat. Two listed buildings lie due west of the site at Lanaways Farm itself. |  |  |

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |   |  |  |  |
|---|---|--|--|--|
| Site Ref:   | <b>Ref:</b>   SA329   |  |  |  |
| Conclusion:   | "The landowner has expressed an interest to develop the site meaning it is          |  |  |  |
|   | 'available'. The site is located in an isolated rural location and unrelated to any |  |  |  |
|   | settlement boundary. It is therefore assessed at 'Not Currently Developable'."      |  |  |  |

| Site's conformity | Site's conformity with Planning Policy                                       |  |  |  |
|-------------------|--|--|--|--|
| Conformity        | The NPPF seeks to protect the countryside whilst supporting thriving rural   |  |  |  |
| with NPPF         | communities within it. It specifically states that LPA's should avoid new    |  |  |  |
|                   | isolated homes in the countryside. If this site were to come forward alone   |  |  |  |
|                   | then it would represent an isolated site in the countryside.                 |  |  |  |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A   |  |  |  |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26    |  |  |  |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |  |  |  |
|                   | character and undeveloped nature of the countryside against inappropriate    |  |  |  |
|                   | development. Development in this area should be essential to its countryside |  |  |  |
|                   | location, and support the needs of agriculture or forestry; Enable the       |  |  |  |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal  |  |  |  |

recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location.

## **ACHIEVABLE?**

**Is the site economically viable?** Assumed yes as proposed by developer.

## ASSESSMENT OF PROPOSED DEVELOPMENT

**N.B.** Landowner only wishes this land be considered if the land adjacent (which is owned by Christs Hospital) is considered. In other words, they do not wish the site to be considered in isolation

| isolation.               |  |   |  |  |  |
|--------------------------|--|---|--|--|--|
| Positives                | <ul> <li>Landowner proposed around 20 to 30 units but higher numbers could be<br/>provided if required, contributing towards the OAN figure.</li> </ul>  |   |  |  |  |
| Negatives                | The site is in open countryside and visible in long views.   |   |  |  |  |
|                          | <ul> <li>Harm to the sett</li> </ul>   | ing of nearby listed buildings likely.                                    |  |  |  |
|                          | Lane is not suitable for significant increase in traffic movements which are   |   |  |  |  |
| Is the site deliverable? | likely.  Suitable?  NO –site would represent an isolated development in to countryside.  |   |  |  |  |
|                          | Available?   | YES – the agent has confirmed that the site is available for development. |  |  |  |
|                          | Achievable? YES – the agent has confirmed that develo  |   |  |  |  |
| Conclusions              | The site is located some distance from the existing settlement and although it does abut a number of properties it is in open countryside and not suitable for development. However, should the surrounding land become available it could be considered deliverable and appropriate at that time. |   |  |  |  |
|                          | SCORE: 3   |   |  |  |  |

## SITE 4A – LAND WEST OF SOUTHWATER

| SITE & SITUATION       |  |
|------------------------|--|
| Location               | TQ 15053 26360   |
| Site Area              | 2ha  |
| Developable Area       | Unknown  |
| Current Use            | Agricultural   |
| Promoters Proposed Use | Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.  Concept masterplan shows it remaining vacant. However, developer has confirmed that all land within their ownership should be considered primarily for residential development with associated required infrastructure. |
| Site Description       | Great House  Farm  Farm  Farm  Farm  |

The site is currently used for agricultural purposes and is bordered by Bonfire Hill, Church Lane and Shaw's Lane to the north, west and south west with land allocated for strategic development to the southeast. East of the site is the Holy Innocent's Parish Church which is also a listed building. The land is in a prominent and elevated position in relation to the surrounding terrain.

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |  |  |  |  |
|---|--|--|--|--|
| Site Ref:   | SA119  |  |  |  |
| Conclusion:   | N.B. This extract relates to a much larger parcel of land of which this          |  |  |  |
|   | assessment will consider a small part.   |  |  |  |
|   | The landowner has expressed an interest in developing the site indicating it is  |  |  |  |
|   | 'available'. This site was proposed as part of a strategic allocation during the |  |  |  |
|   | preparation of the Horsham District Planning Framework 2015 (HDPF). An           |  |  |  |
|   | element of this land was allocated for housing under Policy SD10 in the HDPF     |  |  |  |
|   | and is considered separately under SA413.  |  |  |  |

This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity with Planning Policy |   |  |  |
|--|---|--|--|
| Conformity<br>with NPPF                | When considered with the Horsham strategic allocation, the site will be located adjacent to the settlement of Southwater and in the long term, it will not be considered isolated. The NPPF does however require new development to protect and enhance the natural, built and historic environment which this site may struggle to achieve due to its elevated position and nearby heritage assets.  |  |  |
| Conformity<br>with HDPF                | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. The site is located on the outskirts of Southwater which Policy 3 identifies as 'Small Towns and Larger Villages'. Policy 4 goes on to consider whether settlement expansion is appropriate and is also relevant. HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites adjacent to the built up area boundary, it is noted the neighbourhood plan is seeking to review the BUAB and as a result this policy may have affect. |  |  |

| ACHIEVABLE?                      |                                       |
|----------------------------------|---------------------------------------|
| Is the site economically viable? | Assumed ves as proposed by developer. |

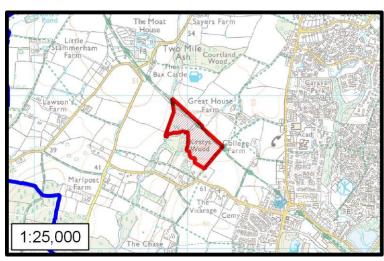

| ASSESSMENT OF PROPOSED DEVELOPMENT |   |  |  |  |  |  |
|------------------------------------|---|--|--|--|--|--|
| Positives                          | The site has potential to contribute to the OAN.                              |  |  |  |  |  |
|                                    | Although not adjoining the urban area at present, the site is well related to |  |  |  |  |  |
|                                    | the main existing strategic allocation.                                       |  |  |  |  |  |

|                          | <ul> <li>The site is moderately close to key services, on foot, and facilities in the<br/>centre of Southwater.</li> </ul>  |  |  |  |  |
|--------------------------|---|--|--|--|--|
| Negatives                | <ul> <li>The site adjoins three important listed buildings and could have a negative impact on their rural setting and collective value.</li> <li>The site is isolated from the existing settlement.</li> <li>The site does not have good pedestrian or cycle links.</li> <li>Prominent position in landscape, likely to have harmful effects.</li> </ul> |  |  |  |  |
| Is the site deliverable? | Suitable?  No – the site is in a prominent location isolated from the existing village at present and would negatively impact the collective value of three grade II Listed Buildings.  YES – the site is owned by a developer and has been put forward.  |  |  |  |  |
|                          | Achievable?  Yes – the site would be economically viable for development.   |  |  |  |  |
| Conclusions              | It is considered that the relationship between the site, landscape and historic setting of three Grade II Listed Buildings would prove insurmountable to development. The site is also isolated from the urban edge of the village.   |  |  |  |  |
|                          | SCORE: 3  |  |  |  |  |

## SITE 4B – LAND WEST OF SOUTHWATER

## **Site Description**

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises two fields, and is promoted as part of a larger scheme by Berkley Homes. The site does not have vehicular access. It adjoins the Downs Link to the north and woodland/residential properties to the south. To the west and east the site adjoins agricultural land. To the east, the site adjoins an existing Strategic Allocation, which could provide future access.

| Site Ref:   | SA119   |  |  |  |  |
|-------------|---|--|--|--|--|
| Conclusion: | N.B. This extract relates to a much larger parcel of land of which this             |  |  |  |  |
|             | assessment will consider a small part.  |  |  |  |  |
|             | The landowner has expressed an interest in developing the site indicating it is     |  |  |  |  |
|             | 'available'. This site was proposed as part of a strategic allocation during the    |  |  |  |  |
|             | preparation of the Horsham District Planning Framework 2015 (HDPF). An              |  |  |  |  |
|             | element of this land was allocated for housing under Policy SD10 in the HDPF        |  |  |  |  |
|             | and is considered separately under SA413.   |  |  |  |  |
|             | This strategic scale site lies within the countryside adjoining the western built u |  |  |  |  |
|             | area boundary of Southwater. A number of Listed Buildings, rights of way and        |  |  |  |  |
|             | Ancient Woodland lie within the site, the majority of which lies in a Bat           |  |  |  |  |

Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity | with Planning Policy  |  |  |  |  |
|-------------------|---|--|--|--|--|
| Conformity        | Although not currently adjacent to the settlement of Southwater, this site        |  |  |  |  |
| with NPPF         | adjoins the HDPF Strategic Allocation. As such it will become an edge of          |  |  |  |  |
|                   | settlement location. The NPPF requires new development to protect and             |  |  |  |  |
|                   | enhance our natural, built and historic environment and this site is not          |  |  |  |  |
|                   | immediately adjacent a listed building or known heritage assets.                  |  |  |  |  |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A        |  |  |  |  |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26         |  |  |  |  |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural       |  |  |  |  |
|                   | character and undeveloped nature of the countryside against inappropriate         |  |  |  |  |
|                   | development. Development in this area should be essential to its countryside      |  |  |  |  |
|                   | location, and support the needs of agriculture or forestry; Enable the            |  |  |  |  |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal       |  |  |  |  |
|                   | recreational use; or Enable the sustainable development of rural areas. In        |  |  |  |  |
|                   | addition, development should be of a scale appropriate to its countryside         |  |  |  |  |
|                   | character and location. The site is located on the outskirts of Southwater        |  |  |  |  |
|                   | which Policy 3 identifies as 'Small Towns and Larger Villages '. Policy 4 goes on |  |  |  |  |
|                   | to consider whether settlement expansion is appropriate and is also relevant.     |  |  |  |  |

on the site?

**Opportunity for employment development** 

| ACHIEVABLE?                      |                                       |
|----------------------------------|---------------------------------------|
| Is the site economically viable? | Assumed yes as proposed by developer. |

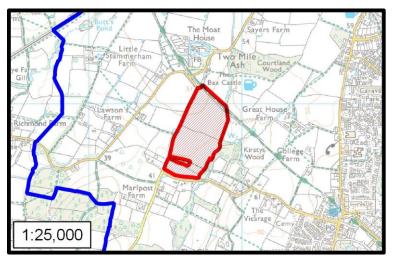

| ASSESSMENT OF PROPOSED DEVELOPMENT |  |  |
|------------------------------------|--|--|
| Positives                          | <ul> <li>Site is highly accessible to centre of Southwater, and will be close to new recreational facilities being delivered on site to the east.</li> <li>The site is on a public bridleway / footpath (downs link) providing sustainable transport connections to the town centre.</li> </ul>          |  |
| Negatives                          | <ul> <li>The site has no known constraints to development, other than access, which can be resolved by routing access through the adjacent site.</li> <li>Loss of greenfield land</li> <li>Reliant on the HDPF Strategic Allocation being delivered and has no direct road access without it.</li> </ul> |  |

|              | Potential for impa   | act on setting of listed buildings.                           |  |
|--------------|--|---|--|
| Is the site  | Suitable?  | Yes – The site is adjacent to the strategic allocation to the |  |
| deliverable? |  | south which is currently being built out. Mitigation would    |  |
|              |  | be required including screening on western boundary. In       |  |
|              |  | isolation this site may struggle to achieve access and would  |  |
|              |  | need to form part of a larger development.                    |  |
|              | Available?   | Yes – developer promoting site.                               |  |
|              | Achievable?  | Yes – especially if brought forward in conjunction with       |  |
|              |  | other sites and could benefit from access via other sites.    |  |
| Conclusions  | This site is considere   | d to be Less Developable. It is suitable for development in   |  |
|              | most regards once the strategic allocation is built out. However the requirement |   |  |
|              | for mitigation on its  | western boundary is noted alongside accessibility issues      |  |
|              | should it come forwa   | ard in isolation.   |  |
|              |  | SCORE: 2  |  |

## SITE 4C – LAND WEST OF SOUTHWATER

| SITE & SITUATION              |                |
|-------------------------------|----------------|
| Location                      | TQ 14721 26841 |

| <b>Promoters Proposed Use</b> | Residential    |
| Site Description              |                |

**Site Description** 

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises three large fields in active agricultural use. The fields adjoin Marlpost Road to the west and Bonfire Hill to the South and are visually exposed along the full length of both of these roads. The land is gently undulating. The site does not include the residential property, Swains (Grade II Listed), but surrounds this building, to the north, south and east.

| Site Ref:   | SA119   |
|-------------|---|
| Conclusion: | N.B. This extract relates to a much larger parcel of land of which this             |
|             | assessment will consider a small part.  |
|             | The landowner has expressed an interest in developing the site indicating it is     |
|             | 'available'. This site was proposed as part of a strategic allocation during the    |
|             | preparation of the Horsham District Planning Framework 2015 (HDPF). An              |
|             | element of this land was allocated for housing under Policy SD10 in the HDPF        |
|             | and is considered separately under SA413.   |
|             | This strategic scale site lies within the countryside adjoining the western built u |
|             | area boundary of Southwater. A number of Listed Buildings, rights of way and        |
|             | Ancient Woodland lie within the site, the majority of which lies in a Bat           |

Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity | with Planning Policy   |
|-------------------|--|
| Conformity        | The site is located in countryside and is not adjacent to any settlement. The  |
| with NPPF         | NPPF requires planning to recognise the intrinsic character and beauty of the  |
|                   | countryside whilst avoiding isolated new homes within it. The NPPF makes it    |
|                   | clear that 'heritage assets are irreplaceable; any harm or loss should require |
|                   | clear and convincing justification. Substantial harm to or loss of a grade II  |
|                   | listed building, park or garden should be exceptional'.                        |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A     |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26      |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural    |
|                   | character and undeveloped nature of the countryside against inappropriate      |
|                   | development. Development in this area should be essential to its countryside   |
|                   | location, and support the needs of agriculture or forestry; Enable the         |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal    |
|                   | recreational use; or Enable the sustainable development of rural areas. In     |
|                   | addition, development should be of a scale appropriate to its countryside      |
|                   | character and location.  |

| Site Description       | Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.  |
|                        | The site comprises agricultural land, in five complete or partial fields. The land is currently farmed. To the north the site abounds woodland and to the south, the site runs adjacent to a former railway line, now a recreational path called 'Downs Link'. The land is |
|                        | accessed via a working farm to the west (Great House Farm). The site adjoins agricultural fields to the south, which forms part of a larger  |

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
|--------------|---|
| Site Ref:    | SA119   |
| Conclusion:  | N.B. This extract relates to a much larger parcel of land of which this assessment will consider a small part.  |
|              | The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413.  This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and |

Strategic Allocation being brought forward by the same owner.

Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The site is located in countryside and is not adjacent to any settlement. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it. The NPPF makes it clear that 'heritage assets are irreplaceable; any harm or loss should require clear and convincing justification. Substantial harm to or loss of a grade II listed building, park or garden should be exceptional'.  |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. |

| Site Description              |  |

**Site Description** 

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises a single agricultural field, directly adjoining an SNCI and ancient woodland. A public footpath transects the site. To the north and west, the site adjoins a public highway (Two Mile Ash Road) and the rear of residential properties on that road). To the south west the land adjoins a public house and to the south, the land bounds the Downs Link bridleway.

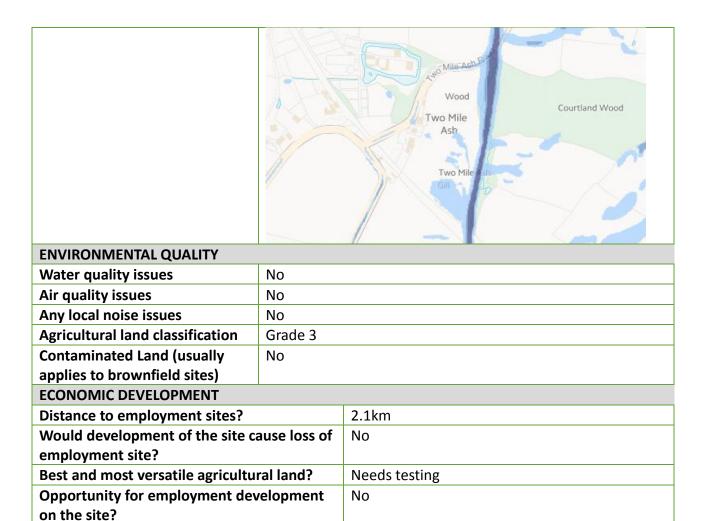

| Site Ref:   | SA119   |
|-------------|---|
| Conclusion: | N.B. This extract relates to a much larger parcel of land of which this             |
|             | assessment will consider a small part.  |
|             | The landowner has expressed an interest in developing the site indicating it is     |
|             | 'available'. This site was proposed as part of a strategic allocation during the    |
|             | preparation of the Horsham District Planning Framework 2015 (HDPF). An              |
|             | element of this land was allocated for housing under Policy SD10 in the HDPF        |
|             | and is considered separately under SA413.   |
|             | This strategic scale site lies within the countryside adjoining the western built u |
|             | area boundary of Southwater. A number of Listed Buildings, rights of way and        |
|             | Ancient Woodland lie within the site, the majority of which lies in a Bat           |

Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity       | with Planning Policy   |
|-------------------------|--|
| Conformity<br>with NPPF | The site is located in countryside and is not adjacent to any settlement. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it.  |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. It is also well removed from the existing settlement so would conflict with HDPF Policy 4. |

| Site Description              |  |  |

The Moat Sayers Farm Street Street Farm Sunnymes Farm Sayers Farm Street Farm Sayers Farm Street Farm Schenger Far

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises two agricultural fields, transacted by a PROW and including a 1 ha area of woodland in the north east of the site. The land adjoins woodland and open countryside to the west and open countryside and residential dwellings to the east. To the north and south the site adjoins open countryside.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |  |
|--------------|---|--|
| Site Ref:    | Part SA119  |  |
| Conclusion:  | N.B. This extract relates to a much larger parcel of land of which this assessment will consider a small part.  |  |
|              | The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413.  This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat |  |

Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'. It is noted however that SA413 is assessed as being deliverable and a small part of this area falls within SA413.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. However, HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites like this. |

Road to the west.

via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity       | with Planning Policy   |
|-------------------------|--|
| Conformity with NPPF    | The site is located in countryside and is not adjacent to any settlement. The NPPF requires planning to recognise the intrinsic character and beauty of the  |
|                         | countryside whilst avoiding isolated new homes within it.  |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. It is also well removed from the existing settlement so would conflict with HDPF Policy 4. |

|             | Acmetable:                                  | site is achievable.   |
| Conclusions | settlement. However<br>should be reassessed | s not developable. It is too far removed from the existing r, should the land to the east come forward then this site d as it may then be suitable and therefore deliverable. |
|             | Mitigation would be                         | required in respect of a number of impacts.   |
|             |   | SCORE: 3  |

# SITE 4H – LAND WEST OF SOUTHWATER

| SITE & SITUATION              |   |
|-------------------------------|---|
| Location                      | TQ 15409 27755  |
| Site Area                     | 13.25ha   |
| Developable Area              | 13.25ha   |
| Current Use                   | Agricultural Land   |
| <b>Promoters Proposed Use</b> | Residential / Mixed   |
| Site Description              | Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.  The site is a relatively flat area of agricultural land separated by |

| Site Ref:   | SA119   |
|-------------|---|
| Conclusion: | N.B. This extract relates to a much larger parcel of land of which this                   |
|             | assessment will consider a small part.  |
|             | The landowner has expressed an interest in developing the site indicating it is           |
|             | 'available'. This site was proposed as part of a strategic allocation during the          |
|             | preparation of the Horsham District Planning Framework 2015 (HDPF). An                    |
|             | element of this land was allocated for housing under Policy SD10 in the HDPF              |
|             | and is considered separately under SA413.   |
|             | This strategic scale site lies within the countryside adjoining the western built $\iota$ |
|             | area boundary of Southwater. A number of Listed Buildings, rights of way and              |
|             | Ancient Woodland lie within the site, the majority of which lies in a Bat                 |
|             | Sustenance Zone. The site also has nature conservation and archaeology                    |
|             | interest. Unless allocated for development through the review of the HDPF or              |
|             | via a made Neighbourhood Plan, it is considered development would be                      |

hedgerows and fences.

| contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not |
|--|
| Currently Developable'.  |

| Site's conformity | with Planning Policy  |
|-------------------|---|
| Conformity        | The site is located in countryside and is not adjacent to any settlement. The   |
| with NPPF         | NPPF requires planning to recognise the intrinsic character and beauty of the   |
|                   | countryside whilst avoiding isolated new homes within it.                       |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A      |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26       |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural     |
|                   | character and undeveloped nature of the countryside against inappropriate       |
|                   | development. Development in this area should be essential to its countryside    |
|                   | location, and support the needs of agriculture or forestry; Enable the          |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal     |
|                   | recreational use; or Enable the sustainable development of rural areas. In      |
|                   | addition, development should be of a scale appropriate to its countryside       |
|                   | character and location. It is also well removed from the existing settlement so |
|                   | would conflict with HDPF Policy 4.  |

### SITE 4I – LAND WEST OF SOUTHWATER

| SITE & SITUATION              |                |
|-------------------------------|----------------|
| Location                      | TQ 15701 27753 |
| Site Area                     | 12.81ha        |
| Developable Area              | 12.81ha        |
| Current Use                   | Agricultural   |
| <b>Promoters Proposed Use</b> | Residential    |
| Site Description              |                |
|                               | Hop Oaste Farm |

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises two large fields in agricultural use. The site adjoins residential properties to the north, and Worthing Road to the east. Western and south boundaries adjoin open countryside and woodland, respectively.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT                                 |
|--------------|---|
| Site Ref:    | SA119   |
| Conclusion:  | N.B. This extract relates to a much larger parcel of land of which this             |
|              | assessment will consider a small part.  |
|              | The landowner has expressed an interest in developing the site indicating it is     |
|              | 'available'. This site was proposed as part of a strategic allocation during the    |
|              | preparation of the Horsham District Planning Framework 2015 (HDPF). An              |
|              | element of this land was allocated for housing under Policy SD10 in the HDPF        |
|              | and is considered separately under SA413.   |
|              | This strategic scale site lies within the countryside adjoining the western built u |
|              | area boundary of Southwater. A number of Listed Buildings, rights of way and        |
|              | Ancient Woodland lie within the site, the majority of which lies in a Bat           |
|              | Sustenance Zone. The site also has nature conservation and archaeology              |
|              | interest. Unless allocated for development through the review of the HDPF or        |

via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity    | with Planning Policy   |
|----------------------|--|
| Conformity with NPPF | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new |
|                      | homes within it.   |
| Conformity           | Site designated on policy map as 'Areas outside built-up area boundary'. A   |
| with HDPF            | number of policies apply to this area but the primary policy is Policy 26  |
|                      | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |
|                      | character and undeveloped nature of the countryside against inappropriate  |
|                      | development. Development in this area should be essential to its countryside   |
|                      | location, and support the needs of agriculture or forestry; Enable the   |
|                      | extraction of minerals or the disposal of waste; Provide for quiet informal  |
|                      | recreational use; or Enable the sustainable development of rural areas. In   |
|                      | addition, development should be of a scale appropriate to its countryside  |
|                      | character and location. However, HDPF Policy 4 does make provision for the   |
|                      | expansion of settlements through Neighbourhood Plans on sites like this.   |

# Site Description

Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.

The site comprises six fields in agricultural use, accessed from Two Mile Ash Lane. The site is surrounded by open countryside and a farm complex to the north. To the east the site also adjoins some residential properties on New Road.

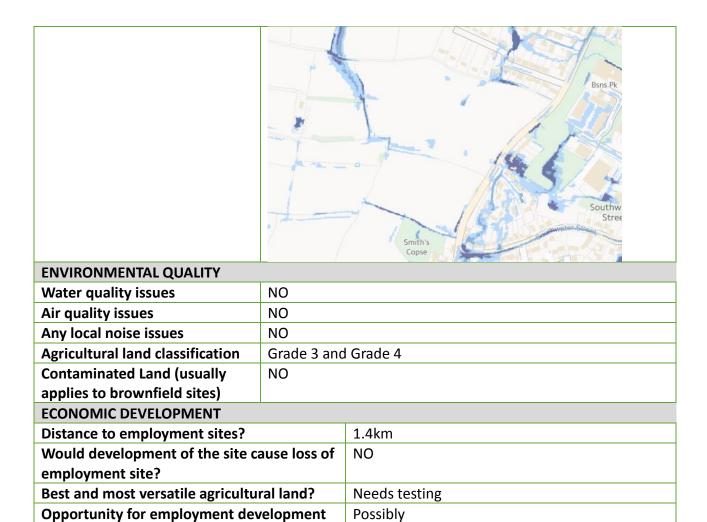

# Site Ref: SA119 Conclusion: N.B. This extract relates to a much larger parcel of land of which this assessment will consider a small part. The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413. This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or

via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. However, HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites like this. |

on the site?

| ACHIEVABLE?                      |                                       |
|----------------------------------|---------------------------------------|
| Is the site economically viable? | Assumed yes as proposed by developer. |

| ASSESSMENT | OF PROPOSED DEVELOPMENT   |  |
|------------|---|--|
| Positives  | Provision of residential land which would contribute towards OAN figure.  |  |
| Negatives  | The area is exposed visually, and would have negative landscape and visual impacts.  Provincial to the district deviations and development.                         |  |
|            | <ul> <li>Proximity to two listed buildings could constrain development.</li> <li>The site may require a wider allocation to deliver sustainable road and</li> </ul> |  |
|            | transport connections into the village.   |  |
|            | <ul> <li>Not adjacent or abutting the built up area boundary.</li> </ul>  |  |
|            | Not very accessible/sustainable.  |  |

| Is the site deliverable? | Suitable?   | No – Not suitable as a standalone site and has some constraints (visual impact and historic impact) which would |
|--------------------------|---|---|
|                          |   | be difficult to overcome or mitigate against.   |
|                          | Available?  | Yes – has been put forward with other sites by a developer.   |
|                          | Achievable?   | YES – the agent has confirmed that development of the   |
|                          | Acilievables  | site is achievable.   |
| Conclusions              | Whilst the site is available, questions regarding suitability and achievability in view of the constraints mean that the site is not likely to be a preferred location for development. |   |
|                          |   | SCORE: 3  |

# HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT Site Ref: SA119 **Conclusion:** N.B. This extract relates to a much larger parcel of land of which this assessment will consider a small part. The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413. This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

Working farm, including a number of farm buildings.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity with NPPF    | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. However, HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites like this. |

| Site Ref:     | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT SA119                            |
| Conclusion:   | N.B. This extract relates to a much larger parcel of land of which this              |
|               | assessment will consider a small part.   |
|               | The landowner has expressed an interest in developing the site indicating it is      |
|               | 'available'. This site was proposed as part of a strategic allocation during the     |
|               | preparation of the Horsham District Planning Framework 2015 (HDPF). An               |
|               | element of this land was allocated for housing under Policy SD10 in the HDPF         |
|               | and is considered separately under SA413.  |
|               | This strategic scale site lies within the countryside adjoining the western built up |
|               | area boundary of Southwater. A number of Listed Buildings, rights of way and         |
|               | Ancient Woodland lie within the site, the majority of which lies in a Bat            |
|               | Sustenance Zone. The site also has nature conservation and archaeology               |
|               | interest. Unless allocated for development through the review of the HDPF or         |

east.

via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new homes within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. However, HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites like this. |

## SITE 4M – LAND WEST OF SOUTHWATER

| SITE & SITUATION              |   |  |
|-------------------------------|---|--|
| Location                      | TQ 15518 26998  |  |
| Site Area                     | 8.78 ha   |  |
| Developable Area              | 8.78 ha   |  |
| Current Use                   | Agricultural land, with residential and agricultural buildings  |  |
| <b>Promoters Proposed Use</b> | Residential   |  |
| Site Description              | Newlands Southwater Street Street Sunnyme Farm  The Moat Sayers Farm  54  Two Mile Courtland Wood Bax Cartle  Great House Farm  College Farm  11:25,000   |  |
|                               | Site 4 has been split into 13 separate sites for assessment purposes in accordance with our methodology. The developer has put forward a concept masterplan for Site 4.   |  |
|                               | Site comprises two large agricultural fields and a number of buildings in residential and agricultural use. The site adjoins Worthing Road, and the rear of some residential properties fronting Worthing Road. |  |

| LIDG CEDATECI | CHOUSING AND ECONOMIC LAND AVAILABILITY ACCESSMENT                                   |
|---------------|--|
| Site Ref:     | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT SA119                            |
| Conclusion:   | N.B. This extract relates to a much larger parcel of land of which this              |
|               | assessment will consider a small part.   |
|               | The landowner has expressed an interest in developing the site indicating it is      |
|               | 'available'. This site was proposed as part of a strategic allocation during the     |
|               | preparation of the Horsham District Planning Framework 2015 (HDPF). An               |
|               | element of this land was allocated for housing under Policy SD10 in the HDPF         |
|               | and is considered separately under SA413.  |
|               | This strategic scale site lies within the countryside adjoining the western built up |
|               | area boundary of Southwater. A number of Listed Buildings, rights of way and         |
|               | Ancient Woodland lie within the site, the majority of which lies in a Bat            |
|               | Sustenance Zone. The site also has nature conservation and archaeology               |
|               | interest. Unless allocated for development through the review of the HDPF or         |

To the west and the south lies open countryside.

via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'.

| Site's conformity    | with Planning Policy   |
|----------------------|--|
| Conformity with NPPF | The site is located in countryside. The NPPF requires planning to recognise the intrinsic character and beauty of the countryside whilst avoiding isolated new |
|                      | homes within it.   |
| Conformity           | Site designated on policy map as 'Areas outside built-up area boundary'. A   |
| with HDPF            | number of policies apply to this area but the primary policy is Policy 26  |
|                      | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |
|                      | character and undeveloped nature of the countryside against inappropriate  |
|                      | development. Development in this area should be essential to its countryside   |
|                      | location, and support the needs of agriculture or forestry; Enable the   |
|                      | extraction of minerals or the disposal of waste; Provide for quiet informal  |
|                      | recreational use; or Enable the sustainable development of rural areas. In   |
|                      | addition, development should be of a scale appropriate to its countryside  |
|                      | character and location. However, HDPF Policy 4 does make provision for the   |
|                      | expansion of settlements through Neighbourhood Plans on sites like this.   |

#### **LANDSCAPE**

Recommendation in respect of relevant LCA from Southwater Landscape Sensitivity and Capacity Study Essentially flat in the east but more rolling in the west, this area is generally well enclosed from adjoining sensitive landscapes to the west, except for the western field south of the Downs Link. The presence of existing development and that under construction means that the area is evidently at the settlement's edge. Presence of Grade II\* Listed Building requires the protection of its setting. Significant capacity for development subject to effects from development in the western field south of the Downs Link. Mitigation is likely to be essential at this boundary.

| HERITAGE                                  |  |   |  |
|---|--|---|--|
| Impact on Listed Building and its setting |  | Listed building to the north west (Great House Farmhouse) (Listing – 1286023). It is considered likely that there will be a negative impact on the setting of this listed building. |  |

## **ACHIEVABLE?**

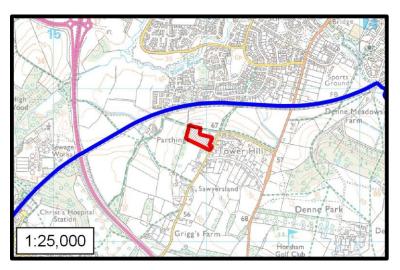

**Is the site economically viable?** Assumed yes as proposed by developer.

| ASSESSMENT OF PROPOSED DEVELOPMENT |   |     |  |
|------------------------------------|---|-----|--|
| Positives                          | Site adjacent to settlement boundary so in conformity with HDPF                   |     |  |
|                                    | Close to Lintot Square and facilities and services.                               |     |  |
|                                    | Minimal landscape harm.   |     |  |
| Negatives                          | Possible impacts on listed building to the west would require careful design      |     |  |
|                                    | or mitigate harm.   |     |  |
|                                    | TPOs present on site which could be mitigated.                                    |     |  |
|                                    | SNCI adjacent to site, which would need to be protected.                          |     |  |
| Is the site                        | Suitable? YES – some impacts possible on nearby listed buildings,                 |     |  |
| deliverable?                       | TPOs and the adjacent SCNI. Though good design and very                           |     |  |
|                                    | little mitigation it is considered this site is suitable.                         |     |  |
|                                    | Available?  | YES |  |
|                                    | Achievable?   | YES |  |
| Conclusions                        | Site is less developable – it is policy compliant but minimal considerations      |     |  |
|                                    | against the site coming forward. Careful consideration will be required to ensure |     |  |
|                                    | no harm to nearby listed buildings.   |     |  |
|                                    | SCORE: 1  |     |  |

**Site Description** 

The site is a greenfield L-shaped site, with potential for access via Parthings Lane or Two Mile Ash Road. Surrounding uses are residential (to the east) and farm land in the wider area to the north, west and south. The site is bounded by mature trees and hedgerows.

| LIDS STRATES! | CHOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT  |
|---------------|---|
|               | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
| Site Ref:     | SA416   |
| Conclusion:   | The landowner has expressed an interest to develop the site meaning it is 'available'. The site is located in the countryside west of Tower Hill, which is an unclassified settlement as defined by Policy 3 of the Horsham District Planning Framework 2015 (HDPF), thus a settlement with few or no facilities or social networks and limited accessibility, and is reliant on other villages and towns to meet the needs of residents.  The Local Plan Review Issues & Options (April 2018) proposed Tower Hill as a secondary settlement where some residential infilling may be acceptable. However the Issues & Options document is an early stage of the local plan review and holds little weight. Unless allocated for development or similar through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the |
|               | HDPF. The site is therefore assessed as 'Not Currently Developable'.  |

| Site's conformity       | with Planning Policy   |
|-------------------------|--|
| Conformity<br>with NPPF | The site is located relatively close to the urban area of Horsham and the facilities and services it offers, the site would therefore be seen as a relatively sustainable site in NPPF terms primarily due to its location. However, the site is not well related to the existing urban area and would still be fairly isolated. The NPPF seeks to protect the countryside whilst supporting thriving rural communities within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape character features. |

| Nearest informal public open space, green etc.   |   | c.800m (Blackbridge Lane)              |  |
| ACCESSIBILITY                                    | ACCESSIBILITY   |  |  |
| Nearest bus stop                                 | 180m (Two Mile Ash Road)  |  |  |
| Nearest rail station                             | 2200m (Christ's Hospital)   |  |  |
| Access to highway                                | Access onto Two Mile Ash Road. Existing field access exists which       |  |  |
| Access to highway                                | could probably be upgraded relatively easily.                           |  |  |
|  | The proposed development of 34 units would contribute towards an        |  |  |
| Site generate                                    | increase in traffic along Two Mile Ash Road which is a relatively small |  |  |
| significant additional                           | lane. This road currently accommodates much traffic as it is one of the |  |  |
| traffic/congestion                               | main ways to access Christ's Hospital School. More traffic could        |  |  |
|  | aggravate problems along this stretch of highway.                       |  |  |
|  | Again, onto Two Mile Ash  | Road although there is no pavement and |  |
|  | little space, if any, to provide one. Developer suggests access onto    |  |  |
| Pedestrian access                                | Parthings Lane (along the north of the site) can be provided but the    |  |  |
|  | difference in height between the site and this lane is a concern. The   |  |  |
|  | lane is a narrow road with no existing footway and limited scope for    |  |  |

|   |   | امان مسمر ما | ad Thai | a consideration of a classical transplant in the cases |  |
|---|---|--------------|---------|--|--|
|   | one to be provided. The boundary is also well treed which, if the site  |              |         |  |  |
|   | were to come forward, would provide essential screening. Therefore, pedestrian access to the north is considered challenging. |              |         |  |  |
|   |   |              |         |  |  |

## ASSESSMENT OF PROPOSED DEVELOPMENT

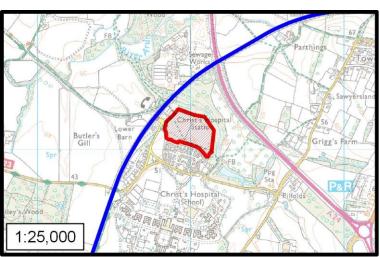

| Positives    | Would provide 34 dwellings towards the OAN.  |  |  |  |
|--------------|--|--|--|--|
|              | Site is relatively well screened.  |  |  |  |
| Negatives    | Would increase traffic on Two Mile Ash Road which is a narrow lane,                        |  |  |  |
|              | pedestrian access would also likely be here which is not considered                        |  |  |  |
|              | appropriate.   |  |  |  |
|              | Would result in t  | he sprawl of the Tower Hill settlement.                      |  |  |
|              | Not close to exist   | ting services or employment opportunities.                   |  |  |
|              | New residents w  | ould be reliant on private modes of transport despite bus    |  |  |
|              | route passing by.  |  |  |  |
| Is the site  | Suitable? NO – The site has poor accessibility and its development                         |  |  |  |
| deliverable? | would be contrary to national and local planning policy.                                   |  |  |  |
|              | The proposed development would represent a suburban  |  |  |  |
|              | development in a countryside location but other forms of development may be more suitable. |  |  |  |
|              |  |  |  |  |
|              | Available?   | YES – the agent has confirmed that the site is available for |  |  |
|              | Available:   | development.   |  |  |
|              | Achievable?  | YES – the agent has confirmed that development of the        |  |  |
|              | Acmerable.   | site is achievable.  |  |  |
| Conclusions  | The site considered less developable for the reasons set out above.                        |  |  |  |
|              |  | SCORE: 2   |  |  |
|              | 1  |  |  |  |

# SITE 6 – THE WARREN, CHRIST'S HOSPITAL

| <b>Promoters Proposed Use</b> | Residential with some additional parking for residents and users of |
|                               | the railway station.  |
| Sita Doscription              |   |

#### **Site Description**

The site is located to the east of Christ's Hospital railway station. It is bounded by Sparrow Copse to the north and east, Bluecoat Pond Road to the south and Barnes Wallis Avenue to the east. It is currently undeveloped and flat. It lies in close proximity to the residential development around Bluecoat Pond.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT                                |
|--------------|--|
| Site Ref:    | SA129  |
| Conclusion:  | "The landowner has expressed an interest in developing this site indicating its    |
|              | availability. The site is in the countryside north of and adjacent to the Built Up |
|              | Area Boundary of Christ's Hospital, which is classified as a smaller village in    |
|              | Policy 3 of the Horsham District Planning Framework(HDPF), having limited          |
|              | services and facilities. The site has some access problems due to the rural nature |
|              | of the surrounding road network. Unless allocated for development within the       |
|              | revised Horsham District Planning Framework (HDPF) or a made Neighbourhood         |
|              | Plan, any development would be contrary to Policies 1 to 4 and 26 of the HDPF.     |
|              | It is therefore assessed as Not Currently Developable."                            |

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The NPPF seeks to protect the countryside whilst supporting thriving rural communities within it. It specifically states that LPA's should avoid new isolated homes in the countryside.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. |

| ASSESSMENT | OF PROPOSED DEVELOPMENT   |
|------------|---|
| Positives  | • Could provide between up to 150 units towards the OAN (based on site area). |

| Remote from facilities and services, little if any within walking distance.  Would represent the expansion of the existing small Christs Hospital settlement into the countryside.  Suitable?  NO - Whilst the site is located adjacent to existing housing and the railway station, there are few services or facilities within walking distance. This is likely to lead to dependency on private motor vehicles which, when combined with narrow lanes used to access the site leave a somewhat undesirable outcome. This could be mitigate with the provision of enhanced road access to the site. These factors, alongside the site being contrary to strateg policies in the local plan lead this site to being considered not suitable for development.  Available?  Achievable?  YES – the agent has confirmed that the site is available for development.  YES – the agent has confirmed that development of the site is achievable.  As the site is not considered suitable at this time but could be considered suitable should improved access roads be created. It is however considered that the quantum of development that could be provided on the site is unlikely to make new/improved roads to it. It is therefore considered that this site may be developable subject to improved accessibility.  |             |   |          |  |  |
|--|-------------|---|----------|--|--|
| Poor access by road, access is via narrow lanes that are already heavily used     Remote from facilities and services, little if any within walking distance.     Would represent the expansion of the existing small Christs Hospital settlement into the countryside.  Is the site deliverable?  Suitable?  NO - Whilst the site is located adjacent to existing housing and the railway station, there are few services or facilities within walking distance. | Site Description       |  |  |
|                        | The site is an agricultural field located immediately north of the A24 on the Hop Oast roundabout. East of the site lies the Horsham Park & Ride facility alongside a household waste site. Other uses are also present here closely relating to the A24, such as a petrol filling   |  |
|                        | station. Two Mile Ash Road lies to the west with open farmland beyond it. Farmland also lies to the north with the small settlement of Tower Hill around 600m distant. The site is currently in agricultural use and slopes gently in an east/west direction.  |  |

| <b>HDC STRATEGI</b> | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
|---------------------|---|
| Site Ref:           | SA626   |
| Conclusion:         | This site is located in the countryside outside the built-up area boundary (BUAB) of Horsham, in close proximity to the Hop Oast depot, WSCC waste recycling centre, a Shell Petrol Filling Station and a Park and Ride to the town of Horsham. The site is predominantly arable farmland, with mature trees on all sides except along the A24. The development of the site would be contrary to the locational strategy as set out in policies 3 and 4 of the HDPF. However, given the proximity of this site to the A24, there may be some potential to consider this site for business use as part of the Local Plan Review. There may be some access constraints to this site given the proximity to the A24. The site is therefore assessed as developable in 11+ years. |

| Site's conformity | with Planning Policy   |
|-------------------|--|
| Conformity        | The NPPF seeks to protect the countryside whilst supporting thriving rural   |
| with NPPF         | communities within it. It specifically states that LPA's should avoid new    |
|                   | isolated homes in the countryside.   |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A   |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26    |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |
|                   | character and undeveloped nature of the countryside against inappropriate    |
|                   | development. Development in this area should be essential to its countryside |
|                   | location, and support the needs of agriculture or forestry; Enable the       |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal  |
|                   | recreational use; or Enable the sustainable development of rural areas. In   |
|                   | addition, development should be of a scale appropriate to its countryside    |
|                   | character and location.  |

| SUITABLE?                             |   |                                      |  |  |  |

| Access to highway  Site generate significant additional traffic/congestion  Pedestrian access | access throug to the An em amoun impac impac alread come netwo | The developer proposes a new lay-by is created to provide direct access off the A24 and also indicated that access may be provided through the household waste site to the east and Two Mile Ash Road to the west.  An employment site such as that proposed would generate significant amounts of traffic but as the primary access would be via the A24 the impact of this is likely to be minimal on the parish roads and lanes. The impact would however be felt at the Hop Oast roundabout which is already at capacity during peak times. Should the east/west access come forward this could have major impacts on the local highway network.  Assumed via the proposed east/west accesses. |  |  |  |  |

| Current Use                   | Unused area set to grass    |  |
| <b>Promoters Proposed Use</b> | Residential (15-20 units)   |  |
| Site Description              |                             |  |
|                               | Christ's Hospital Pylifolds |  |

The site is a small field enclosed by woodland to the north and residential gardens to the east and south. Behind the treed boundary agricultural land lies to the west. The site is relatively flat with a ditch / stream running across it.

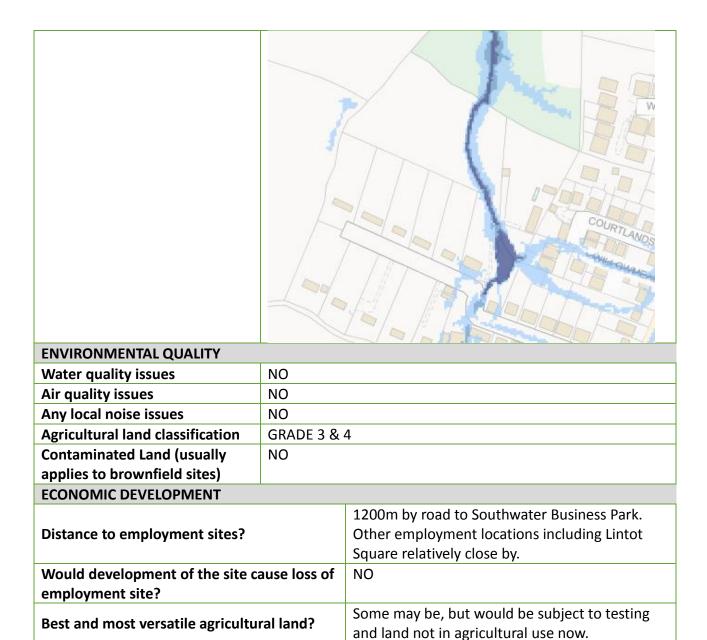

# HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT Site Ref: SA119 **Conclusion:** N.B. This extract relates to a much larger parcel of land of which this assessment will consider a small part. The landowner has expressed an interest in developing the site indicating it is 'available'. This site was proposed as part of a strategic allocation during the preparation of the Horsham District Planning Framework 2015 (HDPF). An element of this land was allocated for housing under Policy SD10 in the HDPF and is considered separately under SA413. This strategic scale site lies within the countryside adjoining the western built up area boundary of Southwater. A number of Listed Buildings, rights of way and Ancient Woodland lie within the site, the majority of which lies in a Bat Sustenance Zone. The site also has nature conservation and archaeology interest. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not

Currently Developable'.

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The site is located adjacent to the settlement of Southwater on a well contained site and is therefore not isolated. It is noted that the NPPF advocates resisting inappropriate development of residential gardens, this site is however not a residential garden despite being located to the rear of a number of properties.   |
| Conformity with HDPF    | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape character features. This site has such boundaries and so could benefit from policy support if taken forward. HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites adjacent to the built up area boundary. |

| Access to highway                              | The current access to the site is via New Road. This is a small and narrow lane that services the residential properties down it. However, the landowner has indicated that he would not want access to be via this road but rather be accessed via new development to the west should the largescale site being promoted be taken forward. It is considered that this would be the most appropriate access for the site. |   |  |  |
| Site generate                                  | The traffic generated would likely to too much for New Road. Access   |   |  |  |

NO

Opportunity for employment development

on the site?

| ACHIEVABLE?                      |                                       |  |
|----------------------------------|---------------------------------------|--|
| Is the site economically viable? | Assumed ves as proposed by developer. |  |

| ASSESSMENT OF PROPOSED DEVELOPMENT |   |  |
|------------------------------------|---|--|
| Positives                          | <ul> <li>Provision of housing land towards OAN.</li> </ul>  |  |
|                                    | <ul> <li>Open space may need to be provided around the drainage ditch currently<br/>across the site.</li> </ul> |  |

|                             | Site is generally in accordance with policy.   |   |  |
|-----------------------------|--|---|--|
| Negatives                   | <ul> <li>Current access not suitable for additional traffic, new access would be required or scheme delivered with adjacent site.</li> <li>Drainage ditch across site would need further investigation and may limit development potential.</li> </ul> |   |  |
| Is the site<br>deliverable? | Suitable?  | YES, WITH ACCESS TO THE WEST - The site is well contained and adjacent to the settlement boundary. It is also broadly compliant with policy if allocated however suitable access would be required via other land to the west for it to be considered suitable. |  |
|                             | Available?   | YES – the agent has confirmed that the site is available for development.   |  |
|                             | Achievable?  | YES – the agent has confirmed that development of the site is achievable.   |  |
| Conclusions                 | The site is currently considered to be less developable as no suitable access can be provided at this time. However, should the land to the west come forward then this site would be considered suitable and fully deliverable.                       |   |  |
|                             |  | SCORE: 2  |  |

#### SITE 9 – STONELEIGH, TOWER HILL

| Site Description              |                                     |

The majority of the land is greenfield, and comprises 4 parcels. The boundaries are formed of mature trees meaning the site is well screened. The topography is very flat. There is a vehicular access from Tower Hill/Two Mile Ash Road separate from the main house. There is a footpath that runs along the northern boundary and a bridleway runs behind the western boundary.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
|--------------|---|
| Site Ref:    | SA330   |
| Conclusion:  | "The landowner has expressed an interest in developing the site meaning it is 'available'. The site is in the countryside west of built up area boundary of Southwater, which is classified as a Small Town/Larger Village in Policy 3 of the Horsham District Planning Framework 2015 (HDPF) with a good range of services and facilities. An Archaeological Notification Area covers site area and Ancient Woodland adjoins eastern boundary. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1-4 and 26 with some conflict to Policy 31 and 34 of the HDPF. The site is therefore considered 'Not Currently Developable'" |

| Site's conformity       | with Planning Policy   |
|-------------------------|--|
| Conformity<br>with NPPF | The site is located relatively close to the urban area of Horsham and the facilities and services it offers, the site would therefore be seen as a relatively sustainable site in NPPF terms primarily due to its location. However, the site is not well related to the existing urban area and would still be fairly isolated. The NPPF seeks to protect the countryside whilst supporting thriving rural communities within it.   |
| Conformity<br>with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape character features. |

| Site Description              |                          |

The Ghase Wood Birchwood Farm Blinks Wood Farm Blinks Woo

The site is a greenfield site, comprising 2 fields. The boundaries are formed of mature trees, except the western boundary, where it bounds the rear garden of Woodland's Farm fronting Shaw's Lane. Other than at this point, the site benefits from good screening. The site is gently sloping in its topography. There is a public footpath which runs adjacent to the southern boundary of the site. Existing access to the site can be taken from Shaw's Lane.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT  |
|--------------|--|
| Site Ref:    | SA393  |
| Conclusion:  | The landowner has expressed an interest in developing the site meaning it is 'available'. The site is in the countryside west of built up area boundary of Southwater, which is classified as a Small Town/Larger Village in Policy 3 of the Horsham District Planning Framework 2015 (HDPF) with a good range of services and facilities. An Archaeological Notification Area covers site area and Ancient Woodland adjoins eastern boundary. Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1-4 and 26 with some conflict to Policy 31 and 34 of the HDPF. The site is therefore considered 'Not Currently Developable'. |

| Site's conformity       | with Planning Policy  |
|-------------------------|---|
| Conformity<br>with NPPF | The NPPF protects the countryside and supports thriving rural communities. It specifically states that LPAs should avoid new isolated homes in the countryside. This site is currently isolated, however, assuming the planning permission for residential development to the north is delivered, the site would no longer be isolated, and could be a supported by NPPF as an urban extension.   |
| Conformity with HDPF    | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. The site is immediately adjacent to the housing allocation HDPR 15 (an allocation for 600 new homes to the north) and to the east woodlands are identified as 'Ancient Woodland' (which is protected under policy 31). HDPF Policy 4 does make provision for the expansion of settlements through Neighbourhood Plans on sites adjacent to the built up area boundary – whilst this is not the case currently the neighbourhood plan is seeking to extend the boundary which may make this site in line with this policy. |

# SITE 11 – JACKRELL'S FARM, REEDS LANE

| SITE & SITUATION              |  |  |  |
|-------------------------------|--|--|--|
| Location                      | TQ 16676 27312   |  |  |
| Site Area                     | 0.35ha   |  |  |
| Developable Area              | ALL  |  |  |
| Current Use                   | Open countryside   |  |  |
| <b>Promoters Proposed Use</b> | Residential  |  |  |
| Site Description              | A potential extension to ribbon development along Reeds Lane. The existing land is relatively flat and wraps around the existing bungalow fronting Reeds Lane. |  |  |

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |     |  |
|---|-----|--|
| Site Ref:   | n/a |  |
| Conclusion:   | n/a |  |

| Site's conformit | y with Planning Policy   |  |  |  |  |
|------------------|--|--|--|--|--|
| Conformity       | The NPPF seeks to protect the countryside whilst supporting thriving rural       |  |  |  |  |
| with NPPF        | communities within it. It specifically states that the LPA should not support    |  |  |  |  |
|                  | new housing in isolated locations, except in exceptional circumstances.          |  |  |  |  |
| Conformity       | Site designated on policy map as 'Areas outside built-up area boundary'. A       |  |  |  |  |
| with HDPF        | number of policies apply to this area but the primary policy is Policy 26        |  |  |  |  |
|                  | (Strategic Policy: Countryside Protection) which seeks to protect the rural      |  |  |  |  |
|                  | character and undeveloped nature of the countryside against inappropriate        |  |  |  |  |
|                  | development. Development in this area should be essential to its countryside     |  |  |  |  |
|                  | location, and support the needs of agriculture or forestry; Enable the           |  |  |  |  |
|                  | extraction of minerals or the disposal of waste; Provide for quiet informal      |  |  |  |  |
|                  | recreational use; or Enable the sustainable development of rural areas. In       |  |  |  |  |
|                  | addition, development should be of a scale appropriate to its countryside        |  |  |  |  |
|                  | character and location. This site is not considered to be in conformity with the |  |  |  |  |
|                  | HDPF.  |  |  |  |  |

| SUITABLE?                                   |                                       |   |   |  |  |

| development?              |                                 |

| ACHIEVABLE?                      |                                       |
|----------------------------------|---------------------------------------|
| Is the site economically viable? | Assumed yes as proposed by developer. |

#### ASSESSMENT OF PROPOSED DEVELOPMENT

|              | I   |  |  |  |  |
|--------------|---|--|--|--|--|
| Positives    | Would provide a modest supply of dwellings towards the parish's needs.          |  |  |  |  |
| Negatives    | Isolated site, poorly related to local facilities.                              |  |  |  |  |
|              | Poor accessibility  |  |  |  |  |
|              | Limited visual screening.   |  |  |  |  |
|              | Contrary to planning policy in the NPPF and Development Plan                    |  |  |  |  |
| Is the site  | Suitable? NO – the site is located in the countryside and its location          |  |  |  |  |
| deliverable? | is contrary to local and national policy. In addition, the site                 |  |  |  |  |
|              |   | has poor access and is potentially 'best and most versatile'.        |  |  |  |
|              | Available?  | YES – the agent has confirmed the site is available for development. |  |  |  |
|              | A abias abla 2  | YES – the agent has confirmed that development of the                |  |  |  |
|              | Achievable?   | site is achievable.  |  |  |  |
| Conclusions  | In view of the above assessment, this site is unsuitable for development within |  |  |  |  |
|              | the plan period.  |  |  |  |  |
|              |   | SCORE: 3   |  |  |  |

# SITE 12 – THE COPSE, WORTHING ROAD

| SITE & SITUATION       |  |  |
|------------------------|--|--|
| Location               | TQ 16112 28167   |  |
| Site Area              | 0.9ha  |  |
| Developable Area       | 0.9ha  |  |
| Current Use            | Single residential dwelling and garden.  |  |
| Promoters Proposed Use | 13 residential dwellings.  |  |
|                        | dge  dge   |  |
| Site Description       | The site is located on the northern edge of Southwater outside of the settlement boundary. It is relatively well contained with a well treed northern boundary. The majority of the site consists of a garden to a single residential property with some small outbuildings. |  |

| <b>HDC STRATEGI</b> | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT                                 |  |  |  |
|---------------------|---|--|--|--|
| Site Ref:           | SA324   |  |  |  |
| Conclusion:         | "The landowner has expressed an interest to develop the site meaning it is          |  |  |  |
|                     | 'available'. The site is located in the countryside, outside the defined built-up   |  |  |  |
|                     | area boundary of Southwater, which is classified as a small town/larger village in  |  |  |  |
|                     | Policy 3 of the Horsham District Planning Framework 2015 (HDPF), having a good      |  |  |  |
|                     | range of services and facilities. The Local Plan Review Issues & Options (April     |  |  |  |
|                     | 2018) proposed an amendment (SW1) to extend the northern built-up area              |  |  |  |
|                     | boundary which would abut the southern boundary of this site. However, the          |  |  |  |
|                     | ssues & Options document is at an early stage of the local plan review and holds    |  |  |  |
|                     | little weight. Unless allocated for development through the review of the HDPF      |  |  |  |
|                     | or via a made Neighbourhood Plan, it is considered development would be             |  |  |  |
|                     | contrary to Policies 1-4 and 26 of the HDPF. The site is therefore assessed as 'Not |  |  |  |
|                     | Currently Developable'."  |  |  |  |

| Site's conformity | with Planning Policy   |
|-------------------|--|
| Conformity        | The NPPF seeks to protect the countryside whilst supporting thriving rural   |
| with NPPF         | communities within it.   |
| Conformity        | Site designated on policy map as 'Areas outside built-up area boundary'. A   |
| with HDPF         | number of policies apply to this area but the primary policy is Policy 26    |
|                   | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |
|                   | character and undeveloped nature of the countryside against inappropriate    |
|                   | development. Development in this area should be essential to its countryside |
|                   | location, and support the needs of agriculture or forestry; Enable the       |
|                   | extraction of minerals or the disposal of waste; Provide for quiet informal  |
|                   | recreational use; or Enable the sustainable development of rural areas. In   |
|                   | addition, development should be of a scale appropriate to its countryside    |
|                   | character and location.  |
|                   | However, HDPF Policy 4 does make provision for the expansion of settlements  |
|                   | through Neighbourhood Plans on sites adjacent to the built up area boundary. |

Greenfield land, this site is relatively flat and well screened behind mature trees and an existing residential dwelling. The site contains an area of woodland containing mature trees. Surrounding uses include residential, open countryside and equine uses. A footpath runs between the main farm and the fields to the west. It also boarders a bridleway.

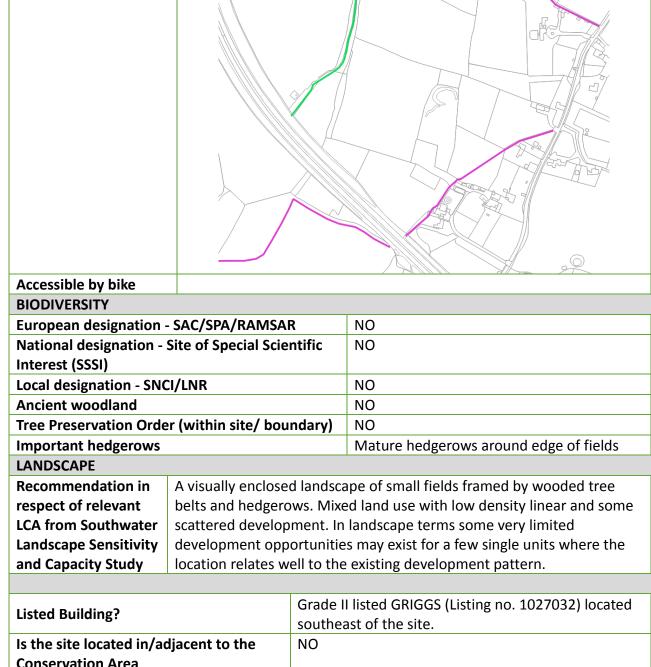

| HDC STRATEGI | HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT                        |  |  |
|--------------|--|--|--|
| Site Ref:    | SA038  |  |  |
| Conclusion:  | "The landowner has expressed an interest to develop the site meaning it is             |  |  |
|              | 'available'. The Grade II listed "Griggs" lies within the site and a high pressure gas |  |  |
|              | pipeline cuts through the western section of the site. The site is located in an       |  |  |
|              | isolated rural location and unrelated to any settlement boundary. It is therefore      |  |  |
|              | assessed as 'Not Currently Developable'."  |  |  |

| Site's conformit | Site's conformity with Planning Policy  |  |  |
|------------------|---|--|--|
| Conformity       | The site is located relatively close to the urban area of Horsham and the           |  |  |
| with NPPF        | facilities and services it offers, the site would therefore be seen as a relatively |  |  |
|                  | sustainable site in NPPF terms primarily due to its location. However, the site     |  |  |
|                  | is not well related to the existing urban area and would still be fairly isolated.  |  |  |
|                  | The NPPF seeks to protect the countryside whilst supporting thriving rural          |  |  |
|                  | communities within it.  |  |  |

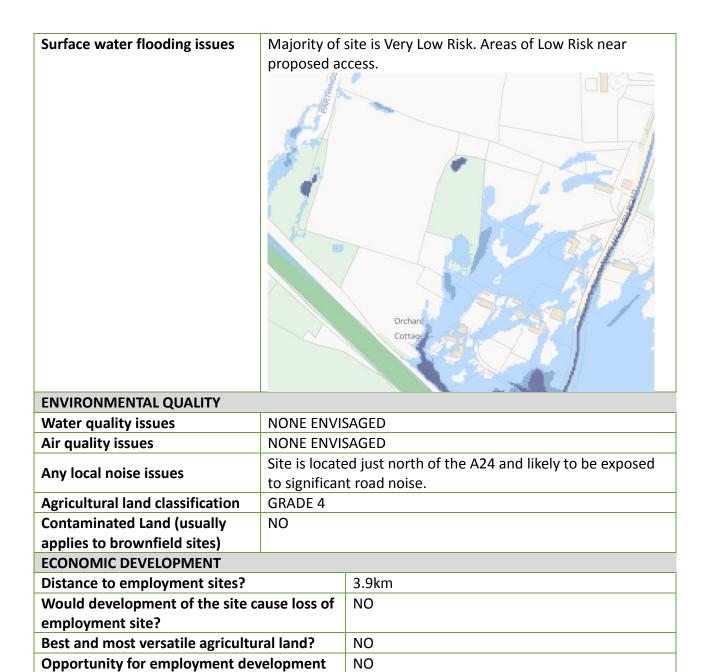

# Conformity with HDPF

Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape character features.

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |     |  |
|---|-----|--|
| Site Ref:   | N/A |  |
| Conclusion:   | N/A |  |

| Site's conformit        | y with Planning Policy   |
|-------------------------|--|
| Conformity<br>with NPPF | This site is located relatively close to the urban edge of Southwater and being well related to the main highway network, the site would therefore be seen as a relatively sustainable site in NPPF terms primarily due to its location and maybe considered suitable for commercial uses.   |
| Conformity with HDPF    | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. However, given that the character of this site is dominated by the roads surrounding it, the LPA may consider that the site is suitable for development, given its proximity to and accessibility from the highway network. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape |

| character features. This site is within defensible boundaries for the |
|---|
| settlement.   |

ite Description

The site is an area of open farmland in countryside south of Tower Hill and north of the A24 and the park and ride facility located immediately north of the Hop Oast Roundabout. The site borders the B2237 on the east and Two Mile Ash Road to the west. The site is relatively flat. The land comprises four fields and areas of woodland.

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT  |
|--------------|--|
| Site Ref:    | SA765  |
| Conclusion:  | The landowner has expressed an interest to develop the site meaning it is 'available'. The site lies in the countryside between the built up area boundaries of Horsham and Southwater as defined by the Horsham District Planning Framework 2015 (HDPF). The southern portion of the site lies in the buffer zone of a high pressure gas pipeline and there are a number of trees protected by Tree Preservation Order that sit on the western boundary. Grigg's, a Grade II listed dwelling, lies to the west. The site is in a relatively isolated rural location and unrelated to any settlement boundary.  Unless allocated for development through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4, 26 and 27 of the HDPF. It is therefore assessed as 'Not Currently Developable'. |

| Site's conformity    | with Planning Policy   |
|----------------------|--|
| Conformity with NPPF | The site is located relatively close to the urban area of Horsham and the facilities and services it offers, the site would therefore be seen as a relatively  |
|                      | sustainable site in NPPF terms primarily due to its location. However, the site is not well related to the existing edge of the urban area and would still be fairly isolated.   |
| Conformity with HDPF | Site designated on policy map as 'Areas outside built-up area boundary'. A number of policies apply to this area but the primary policy is Policy 26 (Strategic Policy: Countryside Protection) which seeks to protect the rural character and undeveloped nature of the countryside against inappropriate development. Development in this area should be essential to its countryside location, and support the needs of agriculture or forestry; Enable the extraction of minerals or the disposal of waste; Provide for quiet informal recreational use; or Enable the sustainable development of rural areas. In addition, development should be of a scale appropriate to its countryside character and location. Policy 4 refers to the expansion of settlements and it highlights the importance of existing defensible boundaries and landscape and townscape character features. |

| ASSESSMENT   | OF PROPOSED DEVELO   | OPMENT  |  |
|--------------|--|---|--|
| Positives    | Could contribute towards the OAN.  |   |  |
|              | Support Park and Ride use  |   |  |
| Negatives    | Possible impact on Listed Buildings  |   |  |
|              | Potential impact on trees and wildlife habitat.                                  |   |  |
|              | Isolated location, not well related to the development boundary of               |   |  |
|              | Southwater.  |   |  |
| Is the site  | Suitable? NO - not really suitable for substantial residential                   |   |  |
| deliverable? |  | development due to location.                                |  |
|              | Available?   | YES – landowner submitted the site for consideration.       |  |
|              | Achievable?  | Possibly – it is likely that obstacles could be overcome to |  |
|              | Acilievable:   | make the scheme achievable.                                 |  |
| Conclusions  | For the reasons set out above we do not consider this site to be suitable for    |   |  |
|              | residential development during the plan period. It is therefore not deliverable. |   |  |
|              |  | SCORE: 3  |  |

# SITE 16 – GARDEN OF PADDOCK HOUSE, SALISBURY ROAD

| SITE & SITUATION              |  |  |  |
|-------------------------------|--|--|--|
| Location                      | TQ 16176 29354   |  |  |
| Site Area                     | 1ha  |  |  |
| Developable Area              | 0.5ha  |  |  |
| Current Use                   | Garden of Paddock House  |  |  |
| <b>Promoters Proposed Use</b> | Residential development - 2 large dwellings.   |  |  |
| Site Description              | This is the garden of Paddock House, fully enclosed and not overlooked. The site is relatively flat and offers a well screened site. |  |  |

| HDC STRATEGI | C HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT   |
|--------------|---|
| Site Ref:    | SA715   |
| Conclusion:  | The landowner has expressed an interest to develop the site meaning it is 'available'. The site takes the form of backland development behind a group of dwellings in an area known as Tower Hill. It lies in the countryside between the built up area boundaries of Horsham and Southwater as defined by the Horsham District Planning Framework 2015 (HDPF). The Local Plan Review Issues & Options (April 2018) proposed Tower Hill as a secondary settlement where some residential infilling may be acceptable. However, the site is outside of the proposed secondary settlement boundary. In addition, the Issues & Options document is at an early stage of the local plan review and holds little weight. Unless allocated for development or similar through the review of the HDPF or via a made Neighbourhood Plan, it is considered development would be contrary to Policies 1 to 4 and 26 of the HDPF. It is therefore assessed as 'Not Currently Developable'. |

| Site's conformity with Planning Policy |   |  |
|--|---|--|
| with NPPF                              | The NPPF seeks to protect the countryside whilst supporting thriving rural communities within it. It specifically states that LPA's should avoid new isolated homes in the countryside. |  |

| Conformity | Site designated on policy map as 'Areas outside built-up area boundary'. A   |
|------------|--|
| with HDPF  | number of policies apply to this area but the primary policy is Policy 26    |
|            | (Strategic Policy: Countryside Protection) which seeks to protect the rural  |
|            | character and undeveloped nature of the countryside against inappropriate    |
|            | development. Development in this area should be essential to its countryside |
|            | location, and support the needs of agriculture or forestry; Enable the       |
|            | extraction of minerals or the disposal of waste; Provide for quiet informal  |
|            | recreational use; or Enable the sustainable development of rural areas. In   |
|            | addition, development should be of a scale appropriate to its countryside    |
|            | character and location.  |

| ASSESSMENT OF PROPOSED DEVELOPMENT |   |  |
|------------------------------------|---|--|
| Positives                          | <ul> <li>The site is well screened although it is outside of the development boundary.</li> <li>Provision of land to meeting the OAN.</li> </ul>  |  |
| Negatives                          | <ul> <li>Access to this site would be difficult as it is from narrow drive, on a narrow residential road, however this may be acceptable for two dwellings.</li> <li>Not located adjacent to the built up area boundary.</li> </ul> |  |
| Is the site deliverable?           | Suitable?   | Possibly – for very few residential units. Subject to access being proven to be appropriate. |
|                                    | Available?  | Yes – owner has promoted site.   |
|                                    | Achievable?   | Access needs to be proven to be acceptable.  |
| Conclusions                        | This site could be suitable and deliverable for development subject to access   |  |
|                                    | issues being overcome. Two family dwellings in this location may be acceptable.   |  |
|                                    |   | SCORE: 2   |

## SITE 17 – LAND AT FOXES CLOSE, SOUTHWATER

| SITE & SITUATION              |  |  |

| Site Description              | The Chase Page 1 Southwater Fig. 1 Southwater Wood 1:25,000  |  |
|                               | The site consists of an area of trees and overgrown vegetation. The site does provide a pocket of greenery and vegetation within an otherwise suburban site. |  |

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |     |  |
|---|-----|--|
| Site Ref:   | n/a |  |
| Conclusion:   | n/a |  |

| Site's conformity with Planning Policy |   |  |
|--|---|--|
| Conformity<br>with NPPF                | The site is located within the settlement boundary for Southwater close to existing shops and services. National Policy support development in locations such as this. However, the site is currently used as public open / amenity space with a number of large mature trees on it. On balance developing this site is not considered to be in conformity with the NPPF. |  |
| Conformity<br>with HDPF                | This site is located within the settlement boundary of Southwater where appropriate infill development is supported. However, given the current use and trees on the site, development of it is unlikely to be in conformity with the HDPF.   |  |

## SITE 18 – LAND AT WORTHING ROAD, SOUTHWATER

| SITE & SITUATION              |  |  |
|-------------------------------|--|--|
| Location                      | TQ 15741 25466   |  |
| Site Area                     | 0.1ha  |  |
| Developable Area              | 0.1ha  |  |
| Current Use                   | Woodland v/ Open Space   |  |
| <b>Promoters Proposed Use</b> | Residential Development of 3 units   |  |
| Site Description              | 1:25,000  The site forms a secondary area of open space in a prominent location in the centre of the village on Worthing Road. It is mainly laid to grass with a number of mature trees. |  |

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |     |  |
|---|-----|--|
| Site Ref:   | n/a |  |
| Conclusion:   | n/a |  |

| Site's conformity       | Site's conformity with Planning Policy  |  |  |
|-------------------------|---|--|--|
| Conformity<br>with NPPF | The site is located within the settlement boundary for Southwater close to existing shops and services. National Policy support development in locations such as this. However, the site is currently used as public open / amenity space with a number of large mature trees on it. On balance developing this site is not considered to be in conformity with the NPPF. |  |  |
| Conformity<br>with HDPF | This site is located within the settlement boundary of Southwater where appropriate infill development is supported. However, given the current use and trees on the site development of it is unlikely to be in conformity with the HDPF.  |  |  |

|                               | RH13 9YT   |  |  |
| Site Area                     | 1.81 hectares  |  |  |
| Developable Area              | 1.81 hectares  |  |  |
| Current Use                   | Employment (currently vacant)  |  |  |
| <b>Promoters Proposed Use</b> | Redevelopment for residential including affordable housing.          |  |  |
|                               | Estimated to have the capacity for around 100 units or fewer if some |  |  |
|                               | employment uses are retained on the site.                            |  |  |
| Site Description              |  |  |  |

A light industrial site (use class B1c) within an established business park comprising office and warehouse space and a car park. The site has been vacant since summer of 2018. To the south of the site is the Southwater Country Park and north is Lintot Square.

| HDC STRATEGIC HOUSING AND ECONOMIC LAND AVAILABILITY ASSESSMENT |     |  |
|---|-----|--|
| Site Ref:   | n/a |  |
| Conclusion:   | n/a |  |

| Site's conformit        | ty with Planning Policy  |
|-------------------------|--|
| Conformity<br>with NPPF | The site is located within the settlement boundary for Southwater close to existing shops and services. National Policy support development in locations such as this. Redevelopment of the site would be supported by some aspects of the NPPF but not by others. A balance would therefore need to be undertaken with regard to the need to protect employment space and provide employment with the need for new homes. It is noted the site is currently vacant. |
| Conformity              | This site is located within the settlement boundary of Southwater where  |
| with HDPF               | appropriate development is supported. However, the site is an employment   |

site and as such care would need to be taken that its loss would not negatively impact economic development or employment opportunities. Policy 3 would be important in this context which identifies Southwater as a Small Town and Larger Village in the Settlement Hierarchy; 'These are settlements with a good range of services and facilities, strong community networks and local employment provision...' Policy 3 requires redevelopment to demonstrate that it is of an appropriate nature and scale to maintain characteristics and function of the settlement in accordance with the settlement hierarchy. It is noted that the site is not a Key Employment Site in the HDPF although it is noted that it is proposed to become one in the emerging Local Plan (ref Issues and Options Consultation). Other policies with regard to the effective use of land, use of brownfields land and need for housing are all noted.

| ASSESSMENT OF PROPOSED DEVELOPMENT |   |   |  |
|------------------------------------|---|---|--|
| Positives                          | <ul> <li>Site is currently vacant and its redevelopment would reuse brownfield land to provide for much needed housing.</li> <li>Good location within centre of village, close to shops and services.</li> <li>Good accessibility</li> <li>Few environmental constraints</li> <li>Some planning policy support.</li> </ul>  |   |  |
| Negatives                          | <ul> <li>Loss of employment floor space which could increase the need to travel out of Southwater for work (negative affect on sustainability).</li> <li>Redevelopment for residential could create conflict between other existing employment uses within the Southwater Business Park.</li> <li>Some planning policy would not support its redevelopment.</li> </ul>  |   |  |
| Is the site deliverable?           | Suitable?   | Yes – assuming loss of employment space is considered acceptable. |  |
|                                    | Available?  | Yes   |  |
|                                    | Achievable?   | Yes   |  |
| Conclusions                        | Redevelopment of this site has few constraints and the potential to deliver around 100 residential units on a brownfield site within the centre of Southwater close to shops and services. However, the site is currently employment land and whilst it is currently vacant for a short while has the potential to provide jobs for local people. These matters will need to be weighed when adopting a strategy to be taken forward in the plan. |   |  |
|                                    |   | SCORE: 1  |  |

## **CONCLUSIONS**

The assessments undertaken in this report have concluded as to whether each site is considered to be Developable, Less Developable or Not Developable. A summary of the assessment conclusions is below and a map illustrating these conclusions is on the next page of this report.

The following sites are considered to be **Developable**:

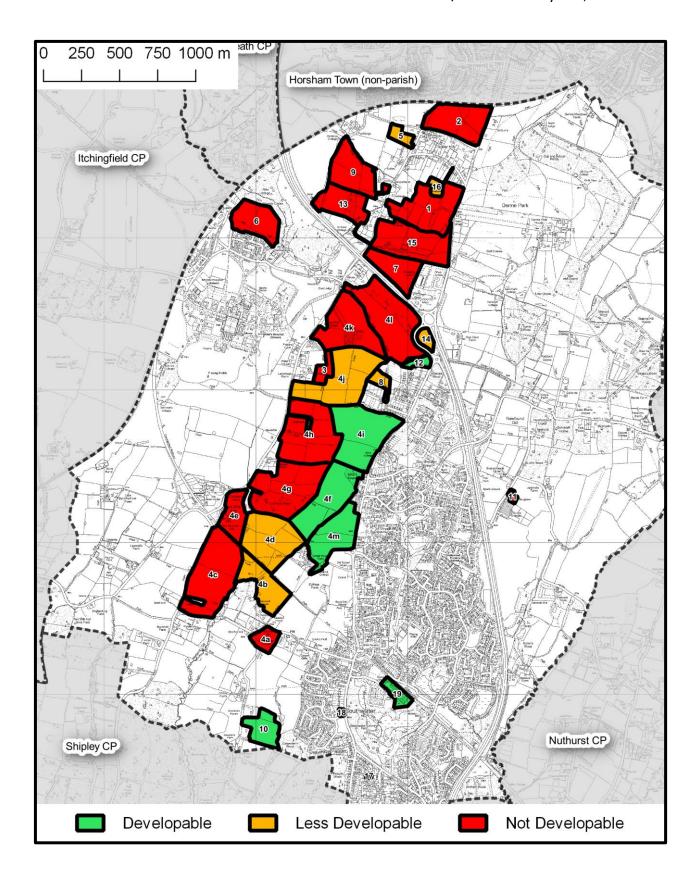

- 4f. Land West of Southwater (10.59ha)
- 4i. Land West of Southwater (12.81ha)
- 4m. Land West of Southwater (8.78ha)
- 10. Woodlands Farm, Shaws Lane (4.04ha)
- 12. The Copse, Worthing Road (0.94ha)
- 19. Sony Site, Southwater (1.81ha)

The following sites are considered to be **Less Developable**:

- 4b. Land West of Southwater (6.46ha)
- 4d. Land West of Southwater (10.83ha)
- 4j. Land West of Southwater (12.96ha)
- 5. The Hermitage, Tower Hill (1.42ha)
- 8. Merryfield, New Road (1.36ha)
- 14. Land Adjacent Hop Oast Roundabout (1.05ha)
- 16. Garden of Paddock House, Salisbury Road (0.97ha)

The following sites are considered to be **Not Developable**:

- 1. Land to the west of Worthing Road, Tower Hill (9.96ha)
- 2. Land to West of Worthing Road and north of Tower Hill (8.1ha)
- 3. Lanaways Farm, Two Mile Ash (1.62ha)
- 4a. Land West of Southwater (2.03ha)
- 4c. Land West of Southwater (14.46ha)
- 4e. Land West of Southwater (4.26ha)
- 4g. Land West of Southwater (13.55ha)
- 4h. Land West of Southwater (13.25ha)

- 4k. Land West of Southwater (10.72ha)
- 4l. Land West of Southwater (13.83ha)
- 6. The Warren, Christ's Hospital (6.03ha)
- 7. Land north of A24 east of Tower Hill (5.56ha)
- 9. Griggs, Tower Hill (7.66ha)
- 11. Jackrell's Farm (0.35ha)
- 13. Stoneleigh, Tower Hill (5.98ha)
- 15. Land west of Worthing Road and east of Two Mile Ash Road, (10.55ha)
- 17. Land at Foxes Close, Southwater (0.1ha)
- 18. Land at Worthing Road, Southwater (0.17ha)

The conclusions of this assessment will be used by the Steering Group when considering the best approach for the plan to take with regards to the allocation of new development within the Neighbourhood Plan.

It should be noted that the conclusions of this assessment in themselves do not dictate which sites should be included in the neighbourhood plan.
